Applicant's Signature

Date

Building Inspector

SWIMMING POOLS INFORMATION SHEET

You must submit a plot plan, of the property showing the location of the home, any other buildings, the location of the septic system and well.

If pool is to be located behind the house, the pool must be a minimum of (5) feet from any side or rear property line and is recommended to be (10) feet from the principal structure.

If pool is to be located in the side yard, the pool must be a minimum of (5) feet from any side property line and a minimum of (50) feet from the front property line and is recommended to be (10) feet from the principal structure.

If pool is to be located in front of the house, the pool must be a minimum of (30) feet from any side property line and a minimum of (50) feet from the front property line and is recommended to be (10) feet from the principal structure.

Once excavation begins for an in-ground pool, the entire area must be enclosed by a security fence.

All in-ground pools must have a minimum (4') high fence with a self-closing/self locking gate.

Decks on above ground pools require hand rails & self closing/ self latching gates.

All electrical work must be inspected by an Electrical Underwriter- Please see attached

Please call the Schodack Building Department once the job is totally completed, so we may schedule a final inspection.

Pool should not be used until all work is completed and a final inspection has been done.
